CONNECTING THE NEXT GENERATION OF ATHLETES

JOINING PLAYSIGHT

Simply click **JOIN** in the top left of the home screen to sign up for a **FREE** PlaySight account. You can also sign up at PlaySight.com or through the app.

And now whenever you go to play on a SmartCourt, you just need to remember your e-mail and password to log in! At least one player needs to log in for the Smart Court system to begin recording and analyzing.

If you ever forget your password, click **FORGOT PASSWORD** on the log in screen to have a new one e-mailed to your PlaySight account.

Pick a **SIX CHARACTER** (or longer) password that will be quick and easy to remember and enter each time you step on court.

The registration form is displayed on a tablet screen. It features a blue header with the 'playsight' logo and a 'BACK' button. The form includes input fields for 'First name', 'Email', 'Last name', 'Retype email', 'Select date' (with a calendar icon), and 'Password'. Below these is a 'Gender' section with radio buttons for 'Male' and 'Female'. A 'JOIN' button with a checkmark icon is on the right. At the bottom, a virtual keyboard is visible.

The 'forgot password' form is displayed on a tablet screen. It features a blue header with the 'playsight' logo and a 'BACK' button. The main area has a dark background with the text 'Enter your e-mail to retrieve your password' and a white input field. Below this is a 'Thank you' message. At the bottom, there is a 'SEND' button with a checkmark icon and a virtual keyboard.

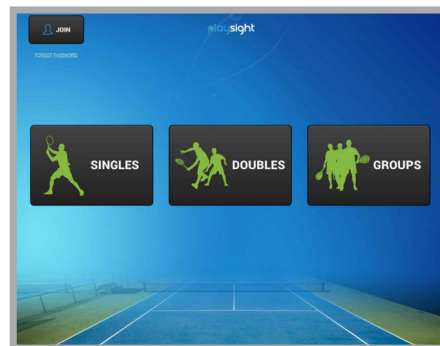

Once you have created an account, you can select **SINGLES**, **DOUBLES**, or **GROUPS**. After doing this, you log in to your PlaySight account.

SINGLES - for 1 v 1 tennis, or lessons involving a coach and a player. The full SmartCourt analytics and tracking are available in this mode.

DOUBLES - all of the video tools (replay, multi-angle analysis) are available here, but no analytics (coming soon).

GROUPS - this is a way for coaches to log in and manage as many players as they would like - with quick and easy switching depending who is on the SmartCourt.

Check out the other pages in this guide for more information on each.

1. Select **WARM UP** to get out and hit with no specific goal or target. The SmartCourt will count all strokes that land within the singles court.
2. Select **DRILLS** for gamified tennis training - play points and/or train with time, zone, and stroke targets.
3. Select **SERVE AND RETURN** to work on serves and return strokes.
4. Select **PLAY POINTS** to start a match or tournament, or to play baseline points.
5. Select **VIDEO ONLY** for just the video recording and no statistics or analytic tracking.
6. Select **PREVIOUS SESSIONS** to review previous sessions from that SmartCourt.

1. Select **BASELINE POINTS** to play baseline points with no serves or serve tracking. The first feed of each rally does not count.
2. Select **MATCH** to play a match (or points with serves) with full analytics, statistics, and video.
3. Select **TOURNAMENT** to play a match without real-time stats, but with the **PLAYFAIR CHALLENGE** system - use the multi-angle video replay to challenge close calls, and access all analytics and stats after the match has concluded.

Always be sure to select **SWITCH SIDES** when you and your opponent switch sides - this way all of the stats tracked will be accurate for each player.

SINGLES - BASELINE POINTS

Baseline points allows you to play points without having to serve.

The first feed of each rally is not counted by the system - so to be sure to alternate feeding with your opponent for a fair game.

All of the SmartCourt features are available in this mode - from real-time statistics, to the quick stats tab, to instant replay.

Once you are finished playing, be sure to select **ANALYZE** to review your game in greater detail.

The audio options include winners (the system will clap for these) and line calling - and you can always mute and adjust the volume of these.

SINGLES - MATCH

Match mode provides all analytics and statistics. You can toggle on the screen between different stats (using these <> arrows) that will update as you play.

You can also utilize the instant replay function, and turn on or off audio line and speed calling for serves.

Be sure not to continue playing after a point is over, as the analytic cameras will “override” the system and continue to track on-court action.

Once you are finished playing, be sure to select **ANALYZE** to review your game in greater detail.

Always be sure to select **SWITCH SIDES** when you and your opponent switch sides - this way all of the stats tracked will be accurate for each player.

SINGLES - TOURNAMENTS

Tournament mode has the same functionality as match mode, but there are no statistics or data available in real time. You can still review your match afterwards and see all information (by clicking **ANALYZE**).

Tournament mode is PlayFair Challenge-enabled. What that means - you and your opponent can challenge and review close line calls - just like the professionals do. Check out the next page for more on this feature.

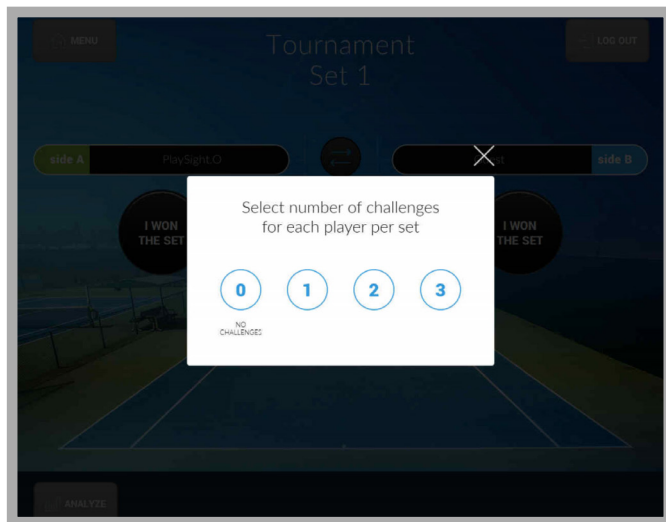

Always be sure to select **SWITCH SIDES** when you and your opponent switch sides - this way all of the stats tracked will be accurate for each player.

SINGLES - PLAYFAIR CHALLENGE

Each tournament match gives you the option to add anywhere from 1 to 3 challenges for each player (you can also select zero).

The PlayFair Challenge system was created for tournaments of all levels - from the pros to collegiate tennis to club tennis. Using multi-angle video gives players instant replay tools at their fingertips each time they step onto a SmartCourt.

If you want to challenge a call, simply walk over to the kiosk and press **CHALLENGE** to access the multi-angle instant replay of the serve or stroke under review.

1. You can customize the target zones, time limits, and stroke goals in each practice session. Every Ball Counts!
2. The SmartCourt system will automatically set up drills for you and your opponent based on your handedness (righty to righty crosscourt forehands, for example).
3. Whatever stroke you select ('any stroke' will count every type of stroke you hit) will be the only one tracked and recorded. For example, if you select crosscourt forehands, any other type of stroke (other forehand variations, or backhands) won't receive any points from the system.
4. The system also tracks volleys.

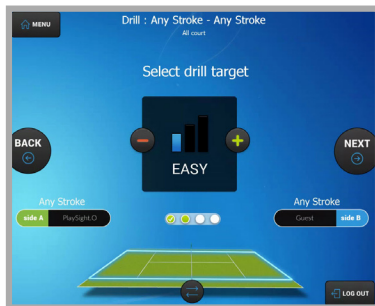

Select **FEEDING** for one of the sides of the court if you don't want the stats tracked from that side (typically for a coach or if there are two players). The system won't track any of the movement or statistics from this side of the court.

Once you have selected your drill strokes (whether it is any strokes, feeding, forehands, and so on), the next screen allows you to customize the difficulty.

EASY - All strokes that land in the singles court are counted.

MEDIUM - All strokes that land beyond the service line are counted.

HARD - All strokes that land nine feet from the baseline and deeper are counted.

You continue to customize your drill with a few more options.

HEAD TO HEAD - the two players compete against each other.

TEAM WORK - the two players work together towards a specific goal.

Finally, you can select a specific goal for your drill.

TIME TARGET - get as many strokes in the target area in a certain amount of time.

STROKE TARGET - work towards a stroke target goal.

FREE STYLE - no specific time or stroke target goal.

SINGLES - SERVE & RETURN PRACTICE

1. Ensure that you wait at least 3 seconds between each serve to give the system time to track it.
2. Real-time serve speed is available - put all sounds on to also have the system call lines (you can always mute or adjust the volume).
3. Serves can be hit from either side of the court and from both the deuce and ad sides.

Coaches - make sure you don't stand beside your player while they are serving - this may interfere with the tracking of the analytic cameras.

At any point, you can select **ANALYZE** to access many features, including:

1. Automated shot tagging
2. Stroke filtering
3. Drawing tools
4. Multi-angle video review
5. The ability to create custom videos
6. 3D Analysis
7. Statistics and data
8. Slow-motion

See the next page for more.

Create and save your own custom highlight or coaching videos easily. Select **RECORD VIDEO** and capture your voice (optional) and whatever is playing on the kiosk screen. Pause at any time and select STOP to save it to your PlaySight account.

1. **The VIDEOS TAB** - this shows all camera angles and strokes hit.
2. **The ADVANCED FILTER** - easily filter through any stroke type and either player.
3. You can view all strokes, serves, returns, and rallies by clicking on these **EVENT LIST** tabs.
4. Change the camera views by clicking the drop-down bar here.
5. The **EVENT LIST** contains every single stroke hit - the time, who hit it, the type, speed, spin, and result.
6. Collapse the **EVENT LIST** to view the video window in full.
7. Use the drawing tools (lines, arrows, and more) for impactful coaching and review.
8. **RECORD VIDEO** captures everything on the screen, as well as your voice, and saves it to your PlaySight account
9. Change the playback speed of the video by clicking the arrows here.
10. You can skip back and forward, use frame-by-frame, and pause/play the video here.

Select **MATCH MODE** to play a doubles match. Smart Courts do not track analytics or statistics for doubles tennis, but you still get the video and full instant replay capabilities.

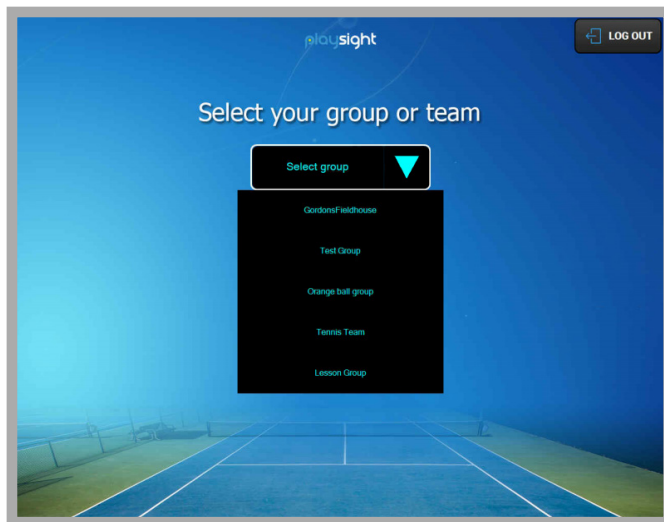

All players logged in (up to four) will receive their full match or training session video after, where they can review it on-court, online, or through the PlaySight app.

Utilize the **REPLAY** button to review or challenge close calls. This feature is available for both singles and doubles tennis. Call lines with confidence knowing that the video is there to support you.

This allows coaches and pros to quickly and easily manage all of their lessons, clinics, and practice sessions.

A coach must be designated as a coach through the club/school's PlaySight.com administrator account. For more on how to set this mode up, read the PlaySight User Manual and watch the Groups Mode tutorials (available at PlaySight.com and on our YouTube page).

The **VIDEO ONLY** mode is a very powerful tool for teams and lessons, especially if players are rotating on/off courts. If you only add players for the specific time they are on a court, they will receive individualized video clips to their PlaySight accounts.

THE PLAYSIGHT APP

With the free PlaySight app, you can live stream from any tennis court in the world (and it also saves your live stream for future analysis or review), broadcast your matches, create custom sessions, or review any of your past SmartCourt sessions with full analytics, video, and data. You can also share any of your top highlights or match video on social media with the click of a button!

playsight

THE WEBSITE

On PlaySight.com, you can access the video, analytics, and data from all of your Smart Court sessions. You can also share your matches and highlight clips on social media, compare yourself to a global tennis community, and much more! PlaySight also tracks your progress over time with a statistics dashboard. This is a great place to edit and modify your account, too.

- Make sure there is one person on each side of the court for accurate statistics and player tracking.
- Make sure only one ball is in play.
- Serve practice can be done from both sides (just wait at least 3 seconds between each serve).
- Matches, tournaments, and serve practice must start with a serve.
- Make sure your audio is on to get real time feedback (but you can always mute the audio too).
- Remember - your video and data is automatically uploaded to the cloud - which you can access at PlaySight.com or through the free PlaySight app.
- Don't forget to Log Out when you are done.
- Only one overview (middle of the court) camera is uploaded to the cloud - you can access all camera views on the kiosk, but only one online or through the App (ask your club or pro which side to play on to get the best footage of your session).
- At least one user must log in for the system to record.
- The video and audio is private and is only accessible by you - unless you choose to share it via social media or with your coaches or family and friends.
- Live streaming is not automatically turned on - please consult with your club, school, or academy to see whether the live stream is activated.

- If you encounter any issues on the kiosk, please notify the front desk or your pro or coach.
- You can contact PlaySight's global support team at support@playsight.com - provide them with as much information as you can for them to give you timely help.
- The SmartCourt system is very accurate (and with each software update and algorithm tweak we get closer to perfect accuracy) - once in a while a close call may be missed - but don't forget you can utilize multi-angle video review to challenge and review close calls.
- The SmartCourt kiosk is the "brain" of the court - all of the cameras are connected to it and everything runs through it - please ensure that the kiosk screen is kept out of the direct sunlight (if outdoors), and is regularly cleaned and well-maintained.
- There are no sensors or wearable devices necessary for the SmartCourt to track your movement
